

GANATH AVINASH G.R

Automation & Software Development
ganathavinash.gr@gmail.com | +91 9342246595 | Chennai – 600061 | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

EDUCATION

AMRITA VISHWA VIDYAPEETHAM
B.Tech – Computer Science Engg.
Chennai | 2024–2028
CGPA: 9.04 | Top 5%

PRINCE SRIVARI VIDYALAYA
HSC – CBSE | 91% | 2024

SKILLS

PROFICIENT
Python | JavaScript | React | Node.js

FAMILIAR
C# | SQL | Full Stack | AI Systems

DATA & ANALYTICS
ML | RAG Systems | Predictive Analytics
Data Visualization | REST APIs
Vector Search | PySpark (learning)

TOOLS & PLATFORMS
Git | Azure (exposure) | Agile/Scrum
Power BI (exposure) | CLI Tools
Tableau (exposure) | Automation

FUNDAMENTALS
DSA | OOP | DBMS | OS basics
Software Engineering | Agile

CERTIFICATIONS

- DBMS – Udemy & Infosys
- Python, Java – Infosys
- Git & GitHub – MindLuster
- English C2 Proficient – EF SET

COURSEWORK

- Data Structures & Algorithms
- Database Management Systems
- Object Oriented Programming
- Software Engineering
- Machine Learning (ongoing)

LANGUAGES

English – C2 Proficient
Tamil – Native
German – Professional (B2)
Hindi – Intermediate

PROFESSIONAL SUMMARY

Second-year CS undergrad at Amrita Vishwa Vidyapeetham (CGPA: 9.04, Top 5%) and IEEE Member. I enjoy building things that actually work — from RAG-based CLI tools to full-stack web apps. Comfortable working across Python, JavaScript, and picking up new tools quickly. Looking to bring these skills into something bigger at Rolls-Royce.

EXPERIENCE

Airports Authority of India (AAI) | Software Intern May 2026 – Present

- Working within AAI's software team on internal tools and process documentation; getting hands-on with enterprise workflows and real-world engineering constraints.
- Supporting automation-related tasks and contributing to operational efficiency improvements in a structured, professional environment.

Institute of Electrical and Electronics Engineers | IEEE Member Oct 2025 – Present

- Part of the Computational Intelligence Society — mainly using IEEE resources to stay current on ML and data systems research, which feeds directly into my project work.

PROJECTS

HackerRank Orchestrate – CLI Support Triage System

2026

- Built a Python CLI tool for user support that uses RAG to pull relevant answers — if the retrieved context isn't confident enough, it automatically escalates to a human instead of guessing.
- Handled the full pipeline: document ingestion, vector retrieval, confidence-threshold logic, and escalation routing. Kept it modular so it's easy to extend.

Tech: Python, RAG, Vector Search, CLI | [View on GitHub](#)

Wits & Bytes – Stock Image Platform

2025

- React + JS SPA hitting the Unsplash API for live image search — built with lazy loading to keep it snappy, and component-based architecture so adding features later isn't painful.
- Responsive across screen sizes without overengineering the CSS; clean separation between data-fetching and rendering layers.

Tech: React, JavaScript, CSS, REST API

Personal Portfolio Website

2026

- Designed and built my own portfolio site using HTML, CSS, JS, and React — wanted full control over how I present my work rather than using an off-the-shelf template.
- Kept the code clean and modular so I can update project entries without touching layout files.

Tech: Builders of web(HTML CSS), JavaScript, React, Docker, Git-hub | [Live Site](#)

ACHIEVEMENTS

- Top 5% in cohort — CGPA 9.04 after 3rd semester at Amrita
- Competitive Programming – Rank in Leetcode – 9L (WW approx.)
- CP Rating - 1800
